LedgerAudit: High-Performance Financial Analysis Platform

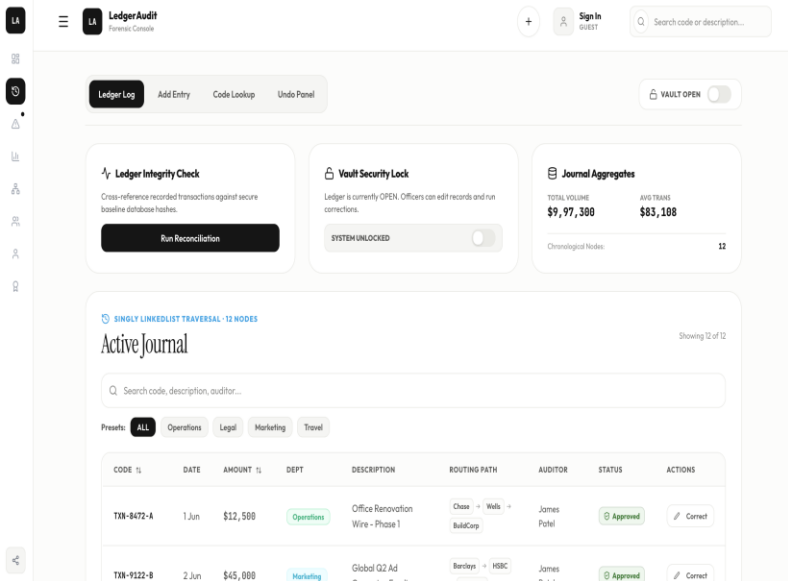

By Ankitraj Jha

FINANCIAL FORENSIC DASHBOARD

LedgerAudit

The audit command center — real-time KPIs, live activity feeds, and instant navigation across forensic tools, all in one unified workspace.

CORE WORKFLOW

Smart Transaction Ledger & Compliance Pipeline

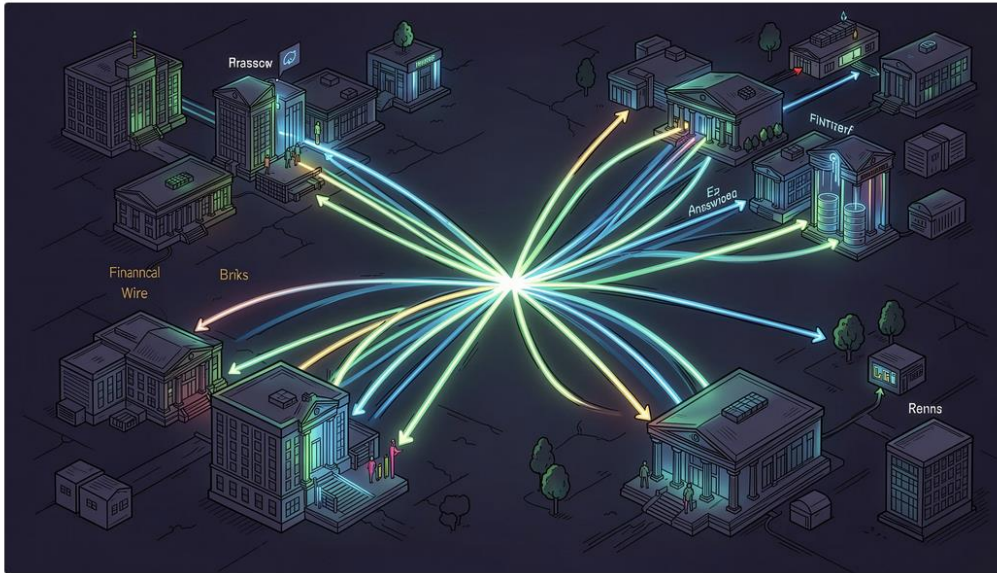

Interactive Transaction Ledger

Filterable table with transaction metadata — IDs, amounts, categories, and routing. Inline status updates (Approved, Suspicious, Mismatched) with instant Undo.

Flagged Review Pipeline

Chronological queue sequencing suspicious records. Action-driven interface guides compliance officers through high-risk files sequentially.

Audit Money Movement & Workload Automation

Visual Fund Flow Tracking

Interactive maps of banking wire routes between institutions.

Pathfinder tool highlights suspicious fund routing paths, total hops, and cumulative transaction values.

Smart Specialist Dispatcher

Automatically assigns flagged files to forensic auditors by domain keywords. Load-balancing routes tasks to specialists with lower caseloads.

Enterprise Security & Subscription Tiers

Data Integrity & Persistence

- **Global Vault Seal** — System-wide switch freeze—locks the ledger during final report compilation
- **Persistent Sessions** — Profiles, themes, and interface settings saved automatically across refreshes

Pricing & Plans

Standard

Basic ledger filtering and tracking for single compliance officers.

Professional

Network path tracing, workload dispatching, and theme customization.

Enterprise

Complete volume capacity, audit lock integration, and premium specialist routing.
